Legal framework for transport of dangerous goods

- In Slovakia:
- Law on Road Transport (Zákon o cestnej doprave)
- Law on Railroads (Zákon dráhach)
- Law on Inland Waterway Transport (Zákon o vnútrozemskej vodnej doprave)

It is introduced functional system of safety officers, drivers and other employees training

Some of transport undertakings have functional system of dangerous goods transportation through the GPS ²

Provision Relating to Telematics and ITS at National Level

On 18th September 2012 was approved new **Law on intelligent transport systems in road transport (zákon o inteligentných dopravných systémoch v cestnej doprave).**

By this law is implemented Directive 2010/40/EU on the framework for the deployment of Intelligent Transport Systems in the field of road transport and for interfaces with other modes of transport.

- Projects in Slovakia:
- Project of Ministry of transport in Slovakia:
 - Transport Information National System,
 - Program for Supporting of ITS Development
- Centre of Excellence for intelligent transport systems and services (University of Žilina)

- Projects in Slovakia :
 - RFID Laboratory in Slovakia - GS1 Slovakia
 - Project of railcars tracking (Information system and RFID)- ZSSK Cargo
 - Project of containers tracking ETISOFT Žilina
 - Project of railcars tracking across Europe (GPS - Communicator) – BUDAMAR LOGISTICS, a.s.

T&T in road transport

- **Satelite technology – GPS**
- Driver in car – qualified service
- **Monitoring of locality, speed, fuel....**
- Information transmission continually – SMS per GSM
- **Connection to car net, to car battery**
- Connection of data in transport company
- **New in Slovak law – intelligent transport systems – automatic signalisation of transport accident**

DEVELOPMENT FUND

T&T in railway transport

- System of train localisation
- Operator of infrastructure have continual monitoring
- Railway operator have to give operator of infrastructure summary of wagons in train
- Evidence of dangerous good wagons
- Optical identification of wagon number Star Cam
- Whitout tags, other information about wagon
- Now is tested in Ostrava – Czech rep.

RFID identification in Duslo company

RFID gate in semi-automatic weighing system

System of optical identification - Star Cam

High Consequence dangerous goods monitoring

- GPS localization
- SMS information (2 time in hour)
- Alarm signal prompt
- 5 various binar signal
- Anti vandal version
- Battery for 5 year operation

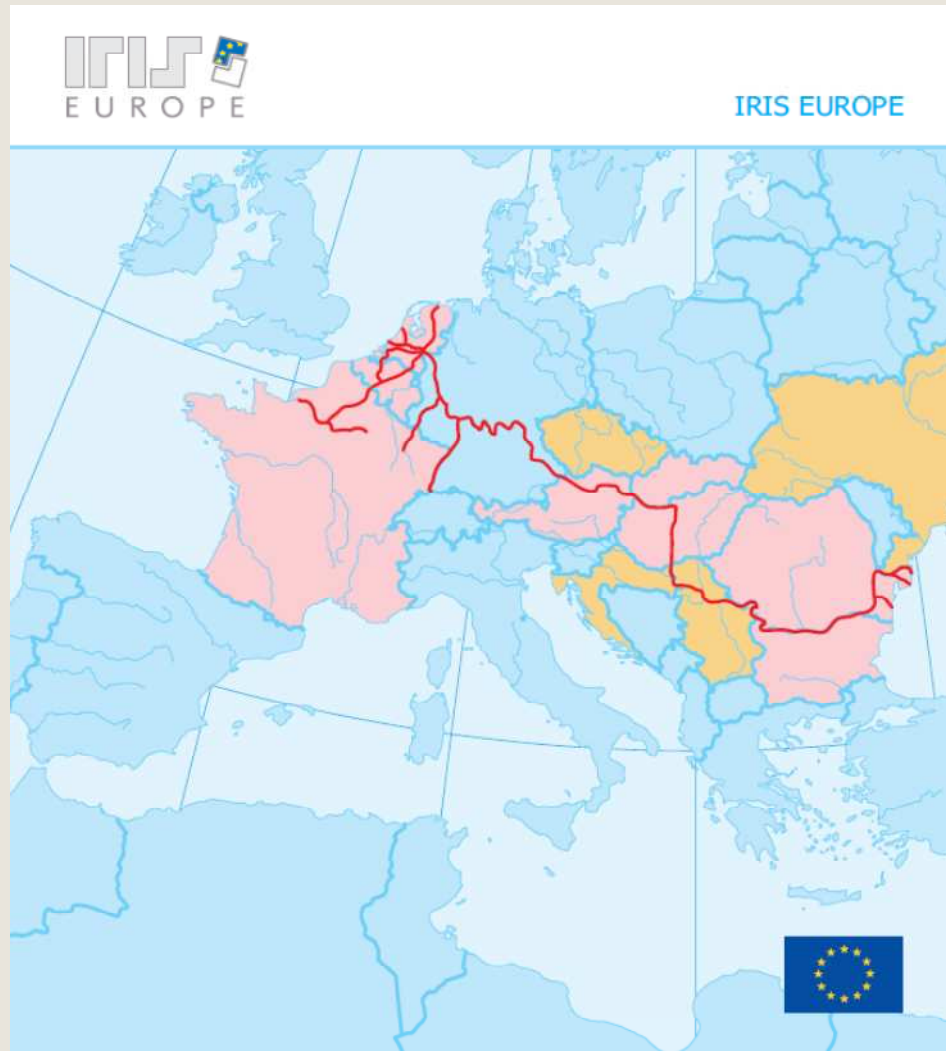

Slovakia:

BUDAMAR LOGISTICS, a.s.

Strengths of tracking and tracing

- Better organisation of drivers and vehicles and working and also competitive advantage in terms of efficiency of transport operations
- Faster reactions in case of problems
- Added value for customers

Weakness of tracking and tracing

- A high number of different technical solutions, which are adopted to special needs especially for transport undertakings
- Insufficient compatibility or interfaces between solutions
- Problems in unaccompanied transport (especially for intermodal transport – road transport is well covered, the rail transport is less covered)
- Little real time information

EUROPEAN UNION
EUROPEAN REGIONAL
DEVELOPMENT FUND

DEFINITIONS OF REQUIREMENTS FOR T&T

- Have information on transport alongside the whole supply chain
- T&T System which works for international transports
- Availability of real time information
- Better interaction with Emergency and Crisis management – higher Security
- Ensuring data protection of sensible information

DEFINITIONS OF REQUIREMENTS FOR T&T

- Ensure easy access of companies to the information about status of transport
- Availability of chemical goods relevant information (e.g. temperature, pressure, etc.)

ChemLog T&T – analyse

- Conjunction of existing systems
- Localisation per Galileo system
- Information transfer per GSM – SMS info
- Priority application – dangerous good 1.10 – telematic systems
- Application per ADR, RID – security of transport
- Alarm information - unit is open, leaked...
- Implementation per UN – WP 15? (ADR, RID, ADN)

EUROPEAN REGIONAL
DEVELOPMENT FUND

Cooperant partner ChemLog T&T

- ZSSK Cargo – main railway operator
- **Information systems in railway stations**
- Connection and exchange of information with operators in neighbouring countries
- **Activities are coordinated per COTIF, RIV....**
- Prepared new information systems
- **Trans Container Slovakia – terminal Dobra**
