ChemMultimodal Transport Brochure

The Czech and Slovak partners of ChemMultimodal took responsibility for the preparation of the ChemMultimodal Transport Brochure which will comprise basic introduction of the Interreg CENTRAL EUROPE transnational programme, the ChemMultimodal project, characteristics of multimodal transport, an overview and recent developments of multimodal transportation on the European continent and in relation with the global context. The final brochure will be disseminated widely in spring 2019 when the ChemMultimodal project terminates.

National Project meeting during international conference Speedchain

More than 50 participants attended the national project meeting alongside representatives of the German partner. The attendees learned about the suitable routes combining rail and road transport that have been identified in result of the pilot phase. The project itself has also been presented at a separate working session during the 11th international logistic conference SpeedCHAIN 2018, Prague. Partners from Czech Republic and Saxony-Anhalt took the chance to present and disseminate project results to an international audience.

Partner Meeting in Ústí nad Labem

Exactly half a year before the project lifetime terminates, partners of ChemMultimodal met in Ústí nad Labem (CZ) on 28 and 29 November 2018. Important topics of the discussion included the documentation of the developed tools to promote multimodal transport and the elaboration of action plans aiming at mainstreaming achievements in the addressed territories. Furthermore, the final events of the project were planned.
